OMAN PAINTS

COMPANY PROFILE

نبذة عن الشركة

تأسست مجموعة شركات البلورة الوطنية للتجارة في سلطنة عمان عام 2010 ، من قبل الفاضل / حمدان مبارك خميس الكلبي . البلورة الوطنية للتجارة لديها العديد من المصانع ، وقد إكتسبت خبرتها ما يقارب أكثر من 5 سنوات في الأعمال التجارية ، والتكنولوجيا الفائقة ، وممارسات التصنيع ، وشبكة التوزيع والقدرات اللوجستية ، وقد تمت الشركة لتكون الشركة الرائدة في مجال تصنيع وتوزيع و تسويق كل ما يخص اعمال المقاولات وما يرتبط بها من منتجات البناء وكل ما يخص المنتجات الكيميائية من أصباغ والعطور والمنظفات بكل اشكالها. كما إن مقر الشركة في محافظة البريمي في سلطنة عمان .

اقسام الشركة

- 1- مصنع الطابوق الآلي
- 2- الكسارات
- 3- الحجر الصناعي
- 4- العطور والمنظفات
- 5- الاصباغ وملحقاتها
- 6- الخدمات اللوجستية و الخدمات القانونية

“Experience In Our Production”

COMPANY PROFILE

ABOUT US

Al Balowra National TRD was established Oman in 2010, with the extreme effort of Mr. Hamdan Mubarak Khamis Al Kalbani. Al Balowra National TRD presently has several factories, being utilizing its expertise gained over more than 5 years in the business, superior technology, manufacturing practices, distribution network and logistic capabilities, company has grown to be the leading manufacturer, distributor and marketer of Blocks, Industrial stone and associated allied building products and the chemical products like paints, perfume & all type of Soap in Al Buraimi, Oman.

OUR DIVISIONS

1. Block factory
2. Crusher
3. Industrial stone factory
4. Soap & Perfume factory
5. Paint & Chemical factory
6. Logistics & Legal services

“Experience In Our Production”

BLOCK FACTORY

Al Balowra National TRD. built their business on a boundless passion for Cement Blocks and on solid foundations such as expertise, down-to-earth values and reliability, all of which shape their high professional profile and represent the strong points that define their work ethic. In over 5 years, they have gained in-depth experience and knowledge of block materials with their many distinctive features and best applications, acquiring special problem-solving skills and distinctive techniques in project development. Al Balowra Cement Blocks offer all-round professional service, from initial project assessment to consultancy and advice on materials, up to and including complete production and installation.

مصنع الطابوق

مجموعة شركات البلورة الوطنية للتجارة دعمت اعمال الصناعات الاسمنتية بالجودة العالية المبنية على الخبرة في عدة مجالات في هذا المضمار مما اكسب المنتج ثقة العميل ثقاً لا حدود لها في صناعة المنتجات الاسمنتية اعتماداً على أسس متينة من الخبرة ، وكلها تشكل مستويات رفيعة في الأداء المهني و تمثل النقاط القوية التي تحدد أخلاقيات العمل الخاصة بهم. و في أكثر من 5 سنوات إكتسبت شركة البلورة الوطنية للتجارة خبرة ومعرفة في المواد الاسمنتية الداخلة في انتاج الطابوق مع العديد من خصائصها المميزة و أفضل التطبيقات ، واكتساب مهارات لحل المشاكل الخاصة و تقنيات مميزة في تطوير المشاريع .

وتشارك شركة البلورة الوطنية للمنتجات الاسمنتية بنشاط مع المهندسين المعماريين والمصممين الشهيدين ، و تقدم الخدمات المهنية في جميع النواحي ، من تقييم المشروع الأولي للاستشارات والمشورة بشأن المواد ، وإنتاج شركة البلورة الوطنية للتجارة من الطابوق يغطي منطقة واسعة من احتياجات العملاء داخل البريمي وخارجها.

مصنع الحجر الصناعي

INDUSTRIAL STONES

Production takes place in a fully equipped workshop using advanced machinery and technology, thanks to which Al Balowra National TRD's expert team can meet all requirements, even from the most adventurous designers, and give rise to unlimited creative ideas. Production has furthermore been diversified and broadened using computerized system to create unique shapes, from solid stone to models, especially when working extremely complex projects. Rounding off the production process in the pre-installation of all parts to verify that installation requirements have been met. The company's know-how and top technology skills, tightly linked to stone-working traditions, mean the use of their skills can be applied to various different sectors and applications.

يتم الإنتاج في ورشة عمل مجهزة تجهيزاً كاملاً بالآلات والتكنولوجيا المتقدمة ، وذلك بفضل فريق من الخبراء من شركة البلورة الوطنية للتجارة الذي يمكنه من تلبية جميع المتطلبات ، بالإضافة الى مجموعة من المصممين التي تمتلك أفكار إبداعية غير محدودة. و علاوة على ذلك تم تنويع الإنتاج و توسيع استخدام نظام محوسب لخلق أشكال فريدة من نوعها ، من الحجر الصناعي إلى نماذج ، خصوصا عندما تعمل في مشاريع معقدة للغاية . يتم أولاً عمل تصميم في غاية الجودة والوضوح يتيح من خلالها للعملاء اختيار الشكل الذي سيظهر من خلاله البناء قبل البدء في عملية تصنيع الحجر ومن ثم يتم تصنيع الحجر والأشكال الهندسية على ايدي مختصين وخبراء حتى يتم تصنيع حجر في غاية الدقة في المقاسات والأحجام ومن ثم يتم تركيبها على ايدي فريق مختص وله من الخبرة الكافية التي تمكنه من اظهار البناء في صورة هندسية غاية فالدقة والجمال

CRUSHER

Al Balowra National TRD investor land to set up a crusher in Wadi SAA area.our facility has the capability to produce different size of aggregates, rocks and rock armour as per specific customer's specification and quantity requirements. All rock production fully complies with the appropriate International Standards (BS, ASTM, AASTHO, CIRIA etc). With a fully equipped laboratory and skilled technicians we are able to assure our clients the supply of consistently compliant products in full accordance with all International Standards, Codes of Practice and client requirements. Testing is carried out internally or where required by independent external bodies.

The Crushers will always remain focused on supplying high quality construction materials, while building strong partnerships with our valued customers, staff and suppliers.

الكسارة

تعتبر الكسارة احدى المشاريع التي استثمرتها شركة البلورة الوطنية للتجارة في منطقة وادي صاع حيث إن لها القدرة على إنتاج مختلف الأحجام من الرمل والحصى لتلبي رغبات العملاء ومتطلباتهم. وكل إنتاج مواد الكسارة يتوافق تماماً مع المعايير الدولية الملائمة (BS, ASTM, AASTHO, CIRIA etc). ومع مختبر مجهز بالكامل وفنيي المختبرات المهرة نحن قادرون على أن نؤكد لعملائنا توريد المنتجات المتوافقة باستمرار بما يتفق تماماً مع كافة المعايير الدولية الكسارة تبقى دائماً تركز على توريد مواد البناء عالية الجودة في حين تسعى إلى بناء شراكات قوية مع عملائنا الكرام والموظفين والموردين

SOAP & PERFUME FACTORY

Through a journey of success, Al-Balowra Perfume Factory became the title of creativity in the field of producing perfumes products. Over several steps in its journey toward becoming one of the successful players in the perfume industry.

AL Balowra National TRD Factory for perfumes represents an integrated system in the fields of high quality perfumes. It works according to a distinguished technique that depends on creativity, consultation, quality management system implementation and team spirit . It does not practice the activity in a traditional way but makes that a real investment to achieve our mission, vision and future plans.

An outstanding team manages our establishment administratively and technically, at both levels of management either board or executive we believe that every team member is important and adds value to our work and quality. we respect the individual's capabilities and provide the environment for each member to excel within our team to achieve the goals and objectives.

It aims to give the necessary domestic market for chemical and care products with high quality and appropriate price detergents through distribution lines up to the majority of the local market segments.

In addition, the efficiency and safety is our motto in application. Al Balowra National Trd. provides high quality care products and favorable price, affordable to the local market and neighboring markets.

مصنع المنظفات والعطور

أت الخبرة والتي ولدت العزيمة فجعلت منها لغة لها شغف الإتيقان لها احتراف التنفيذ. نعم فعالما الإداري هو أفكار واضحة في عقول كوادر متحمسة رسمنا به مساراً جديداً في أعلى معايير التميز فحولنا معطيات هذه الصناعة إلى تجربة ناجحة ضمنت في حد ذاتها المكانة القوية التي نطمح إليها والتي جمعت في طياتها كل التقنية المتطورة في صناعة العطور والتي ساعدت في زخم الإنتاج ومواكبة المتطلبات المتزايدة لأنها اعتمدت على أهم عوامل النجاح قوة وفعالية وهو التكامل

الذي أسسناه منذ البداية وطبقناه واقعاً ملموساً احتراف التنفيذ في كافة المجالات العطرية . وكذلك منتجات العناية بالجسم ومستحضرات التجميل والمعقمات والمطهرات .

إن عالم صناعة العطور في مصنع البلورة الوطنية للمنتجات الكيميائية استطاع أن يدير دفة النجاح بإتقان من خلال التحديث المستمر في الرؤى والأفكار وكذلك مراقبة الجودة الشاملة وامتلاك أحدث التقنيات الحديثة والتي عملت عليها كوادر محترفة صاغت الإبداعات وعددت الخيارات والتي أكدت من خلالها مدى الالتزام بالأنظمة الصارمة لسلامة المنتج وتميزه .

كما تهدف شركة البلورة الوطنية للتجارة الى تقديم ما يلزم السوق المحلي من المنظفات الكيميائية و منتجات العناية ذات الجودة العالية و السعر المناسب عبر خطوط توزيع تصل إلى غالبية قطاعات السوق المحلي

بالإضافة الى ان الكفاءة و الأمانة هي شعارنا تطبيقاً من مفهوم الآية الكرمية استقبنا هذا الشعار ملتزمين به تطبيقاً لا نظير له فقط سائلين المولى عز و جل أن يعيننا على ذلك انه هو المستعان وان نكون مصنعاً رائداً يوفر كافة منتجات المنظفات الكيميائية و منتجات العناية بجودة عالية و سعر مناسب في متناول الجميع للسوق المحلي و الأسواق المجاورة .

مصنع الأصباغ وملحقاتها

PAINT & CHEMICAL

The Paint factory one of the most important factories from ALBalowra National Chemical Products which has the name of this country (Oman Paints) To provide products and services in the field of paint manufacturing in a way that meets clients desires and needs as well as to emulate the developments in the field for the sake of fulfilling these desires now and in the future

We strive to be a leading and competitive paint factory in Oman and realizing the highest quality standards and excellence through knowledge, expertise and enthusiasm and commit to performance and balanced growth.

يعد مصنع الاصباغ إحدى أهم مصانع البلورة الوطنية للمنتجات الكيميائية من حيث إنه يحمل اسم الدولة الغالية على قلوبنا (اصباغ عمان) ولهذا يتطلع المصنع إلى آفاق جديدة في صناعة وتقنية الاصباغ والتوظيف الأمثل لمنتجاتنا في إثراء حياة الإنسان ورفاهيته وأن نكون مصنع اصباغ رائد ومنافس في كل من سلطنة عمان ومنطقة الخليج والعالم أجمع. كما نسعى إلى تحقيق أعلى معايير الجودة والتميز من خلال المعرفة والخبرة والحماس والالتزام بتحقيق المنجزات والنمو المتوازن. من حيث استخدام المواد الخام عالية الجودة في عمليات الإنتاج بعد إجراء الاختبارات والفحوصات عليها بكل صرامة وشمولية وذلك قبل اعتمادها واستخدامها في عملية الإنتاج. مروراً باستخدام أحدث الأجهزة والآلات المتطورة في عمليات الإنتاج. مروراً بتفعيل وتجهيز مختبرات البحث والتطوير وضبط الجودة باستخدام الوسائل المتاحة. بالإضافة إلى اتباع المعايير والمواصفات المعتمدة من الهيئة العمانية للمواصفات والمقاييس والجودة لنخرج منتج في غاية من الجودة والكفاءة .

تم افتتاح مصنع البيتومين كأحد مصانع شركة البلورة الوطنية للمنتجات الكيميائية والتي تقوم بإنتاج المواد العازلة للماء والتي أساسها البيتومين من لفائف بيتومينية و بيتومين مؤكسد ومستحلبات وموانع تسرب . بالإضافة إلى جميع أنواع بيتومين الطرق من أجود أنواع المواد الخام بالعالم . إن ما يميز منتجاتنا هو أن المادة الأولية المستخدمة في التصنيع يتم استيرادها من أكبر الموردين المشهورين على مستوى العالم في سلطنة عمان وغيرها وتتطابق مع متطلبات المواصفات الدولية الخاصة بها , ولم تكتفي (شركة البلورة الوطنية لصناعة البيتومين) عند هذا الحد فقد أخذت على عاتقها التنوع في المنتجات والتميز بالجودة , ولدى الشركة خطط لرفع حجم أعمالها لتتضاعف بإذن الله خلال الأعوام القليلة القادمة وذلك لتغطية احتياجات السوق المحلي والخارجي مما يشا مع زيادة الطلب على هذه المنتجات نتيجة لما يشهده قطاع الإنشاءات من تطور ونمو في المنطقة .

إن شركة البلورة الوطنية لصناعة البيتومين عازمة على ضمان جودة منتجاتها وتعتبر إدارة المصنع بأن الجودة العالية هي الأساس عند تنفيذ أي عمل داخل المصنع وجميع العاملين مسئولين عن جودة أعمالهم اليومية وهذا يتحقق من خلال تطبيق نظام إدارة الجودة المصمم لضمان أن جميع متطلبات الجودة يمكن الوفاء بها .

Bitumen plant was inaugurated as one of the company factories ALBalowra National products and chemical that produces insulation material and water with a basis of bitumen from the coil Bitumen and oxidizer bitumen emulsions and sealants as well as all types of bitumen roads from the finest raw materials in the world.

What distinguishes our products is that the raw material used in manufacturing are imported from the largest-known suppliers in the world in the Sultanate of Oman and the other is identical with the requirements of international standards their own, not only (AL Balowra NATIONAL industry bitumen company) at this point it has taken upon itself the diversity in product quality and excellence, and the company plans to raise its turnover to multiply, God willing, in the next few years in order to cover the domestic and external market needs in line with the increase in demand for these products will be witnessed as a result of the construction sector of development and growth in the region.

ALBalowra NATIONAL industry bitumen company is determined to ensure the quality of its products and is considered factory management that high quality is the foundation when you perform any work inside the plant and all responsible for the quality of their daily working and this is achieved through the application of quality designer management system to ensure that all quality requirements can be met.

LOGISTICS & LEGAL SERVICES

Logistics is the latest branches of ALBalowra National TRD, and is to include an integrated system of activities inside and outside the organization, such as procurement, storage, distribution transport, handling, packaging, customer service, and scheduling requests. It is management tasks logistics co-ordination and integration of these activities in order to provide products and production inputs at the right time and place and in the condition required, in addition to the role of logistics management in customer service, which helps provide the competitive advantage of the organization and increase their profits.

The Department was established to provide specialized legal services that are practical and value added to cater to the various legal needs of the business community. This newly introduced service is provided through our experienced and professional legal team.

الخدمات اللوجستية والخدمات القانونية

تعتبر الخدمات والإدارة اللوجستية من أحدث فروع شركة البلورة الوطنية ، و هي تشتمل على منظومة متكاملة من الأنشطة داخل المنظمة وخارجها مثل الشراء ، التخزين ، النقل التوزيع ، المناولة ، التعبئة والتغليف ، خدمة العملاء ، و جدولة الطلبات . ومن مهام الإدارة اللوجستية التنسيق و التكامل بين هذه الأنشطة بهدف توفير المنتجات و مدخلات الإنتاج في الوقت والمكان المناسب و في الحالة المطلوبة، إضافة إلى دور الإدارة اللوجستية في خدمة العملاء مما يساعد على توفير الميزة التنافسية للمنظمة و زيادة أرباحها.

كما تم استحداث و إنشاء قسم الخدمات القانونية لتقديم خدمات قانونية عملية وذات قيمة مضافة تراعي مختلف احتياجات مجتمع الاعمال القانونية . تقدم هذه الخدمة من خلال فريق عمل قانوني متخصص ذات خبرة واسعة

Enamel Matt

Description

Enamel Matt is a fast air drying matt enamel suitable for all applications over metal, wood and walls.

Technical Data

Viscosity 60-90 ku
Solid content 70-77 %
Density 1.2-1.5 gm/cm³
Gloss Matt
Coverage 6-9 m²/kg (Dry film thickness 50-60 μ)

Substrates and surface preparation

Enamel Matt is recommended for application over wood, metal and walls after proper priming. All new or already painted surfaces should be free from dust, grease and waxes.

Application

Enamel Matt after dilution with white spirit from (10%-30%) to reach the suitable application viscosity.
Drying time at 25 °C & 60% R.H
Initial drying time 3-5h
Recoating time 8h
Final drying time 16h

Tools

Spray gun, brush or roller Cleaner: white spirit

Color

White and colored

Expiry

Three years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

OMAN PAINTS

HAVY TEX

Description

HAVY TEX is a texture product based on acrylic resin and special additives such as sand and quartz coarse granules. Special multipurpose additives in the product offer an attractive sand stone decorative effect and highly durable finish.

Technical Data

Coverage 3-4 kg/m²

Product Features

- Easily formed in different shapes depending on application method;
- Excellent weather resistance;
- Durable; - Resistance to hair crack;
- Excellent hiding power;
- Easy to apply;

Substrates and surface preparation

All new or already painted surfaces should be free from dust, grease and waxes.

Application

1. Apply EX PRIMER in one coat;
2. Stir HAVY TEX well before use.
3. Apply HAVY TEX by plastic or fiber trowel until quartz granules of the coat layer appear on the surface. This is recommended thickness of the coat layer to obtain textured sand stone decorative effect.

Drying time at 25 °C & 60% R.H

Initial drying time 4 h

Final drying time 24 h

Tools

Plastic trowel & putty knife
Cleaner: water

Color

White, colored

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

OMAN PAINTS

Mastic Matt

Description

Mastic Matt is a high quality matt finish based on modified acrylic emulsion with excellent washability, hiding power and whiteness for interior & exterior surfaces.

Technical Data

Viscosity 80_130 ku
Solid content 56±3%
Density 1.52±0.03gm/cm³
Gloss Matt
Coverage 7-10 m²/kg (Dry film thickness 40-45µ)

Product Features

- Alkali resistant;- Excellent hiding power;- High whiteness;- Dirt pick-up resistant;- Excellent leveling;
Substrates and surface preparation
Mastic Matt is recommended for application over bricks, plaster, concrete or cement sheets. All new or already painted surfaces should be free from dust, grease and waxes.

Application

Over new surfaces
1. Apply Pva Primer in one coat;
2. Apply Stucco Filler in two cross layers;
3. Apply Pva Primer in one coat again;
5. Apply Mastic Matt in two coats after dilution with water (15 % dilution) to reach the application viscosity.
Drying time at 25 °C & 60% R.H
Initial drying time 1h
Recoating time 4h
Final drying time 6h

Tools

Brush, roller or airless spray gun Cleaner: water

Color

White and can be colored

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

MASTIC SILK

Description

MASTIC Silk is an attractive elastomeric finish based on acrylic emulsion for interior and exterior surfaces. It is high quality facades paints especially designed to give long lasting durability.

Technical Data

Viscosity 48±3 Ku
Solid content 56±3%
Density 1.28±0.03gm/cm³
Gloss Semi gloss
Coverage 10-12 m²/kg (Dry film thickness 40-45µ)

Product Features

- Chalking resistant; - UV resistant; - Alkali resistant; - High whiteness; - Dirt pick-up resistant;
- Easily cleaned; - Easily applied

Substrates and surface preparation

MASTIC SILK is recommended for application over bricks, plaster, concrete and asbestos cement sheets. All new or already painted surfaces should be free from dust, grease and waxes.

Application

Over new surfaces

1. Apply PVA PRIMER FROM OMAN PAINTS in one coat;
2. Apply STUCCO Putty FROM OMAN PAINTS in two cross layers;
3. Apply PRIMER in one coat again;
5. Apply Silk in two coats after dilution with water (15 % dilution) to reach the application viscosity

Old surface painted with oil or alkyd paints

1. Sand and remove dust;
2. Apply PVA PRIMER in one coat;
3. Apply Mastic Silk as a top coat in two coats after dilution with water (15 % dilution) to reach the application viscosity.

Old painted surface with emulsion paints

1. Wash with water and liquid soap;
2. Rinse with water;
3. Apply primer in one coat;
4. Apply suitable type of emulsion paint in one coat;
5. Apply Mastic Silk in two coats after dilution with water (15 % dilution) to reach the application viscosity.

Drying time at 25 °C & 60% R.H

Initial drying time 1h
Recoating time 4h
Final drying time 6h

Tools

Brush, roller or airless spray gun
Cleaner: water

Color

White and can be colored

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

PVA PRIMER IN

Description

Pva Primer IN is a priming coat based on modified acrylic resin, especially designed for application over concrete, cement, plaster, bricks and stones. It is used for surface pretreatment.

Technical Data

Viscosity 80-130 \pm 3 ku
Solid content 44 \pm 3 %
Density 1.49 \pm 0.03 gm/cm³
Gloss Matt
Coverage 9-12 m²/l

Product Features

- Good impregnating ability;
- Easily applied;
- Fast drying;
- High coverage rate;
- Economic cost;

Substrates and surface preparation

Pva Primer IN Is priming coat for cement and plaster surfaces to consolidate the superficial layer of such surfaces. It is used as a sealing coat to insure excellent adhesion of subsequent water based coating system. All new or already painted surfaces should be free from dust, grease and waxes.

Application

Apply Pva Primer IN in one coat after dilution with water (100 % dilution) to reach the application viscosity. Apply Stucco Filler in two cross layers.

Drying time at 25 °C & 60% R.H

Initial drying time 1h

Final drying time 6h

Tools

Brush or roller

Cleaner: water

Color

White (after drying)

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

 OMAN PAINTS

ACRYLIC ROAD MARKING

Description

A road marking paint based on acrylic resin, pigmented with light fast weather resistant pigment with inert extenders. It is fast drying coating, suitable on asphalt. Good resistance to water, oils and gasoline.

Technical Data

Flas point 32°C
Solid content 42 \pm 2 %
Gravity 1.30 \pm 0.05
Smooth Matt
Coverage 8.5-4.0 m²/l

Product Features

- Good impregnating ability;
- Easily applied;
- Fast drying;
- High coverage rate;
- Economic cost;

Substrates and surface preparation

Before application, the surface should be sound, clean and free from oil, grease, loose particles, dust, etc. Application can be done by the recommended application methods.

Application

Spray motorized road marking equipments, brush or roller. Thinner 5% depending on the method of application.

Drying time at 30 °C

Touch dry 5-10 minutes

Dry to recoat 30 minutes

Color

White, Black, Yellow, Red & Grey

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

 OMAN PAINTS

P.U HARD TOP

TWO COMPONENT

Description

Two component aliphatic acrylic polyurethane finish

Technical Data

Mass density 1.3g/cm
Volume solids 56±2%
Gravity 1.30±0.05
Coverage 11.2m²/l for 50
Touch dry after 1hour
Full cure after 4days

Product Features

- unlimited recoatable
- excellent resistance to atmospheric exposure conditions
- excellent colour and gloss retention
- tough and abrasion resistant
- can be recoated even after long atmospheric exposure
- cures at temperatures down to -5°C

Substrates and surface preparation

During application and curing a substrate temperature down to -5°C is acceptable provided the substrate is dry and free from ice substrate temperature should be at least 3°C above dew point maximum relative humidity during application and curing is 85% premature exposure to early condensation and rain may cause colour and gloss change.

Application

High gloss thin film polyurethane finishes tend to atomise less easily the widely used airless spray application method is for those kind of finishes possible but not be the best option as small nozzles and high pressures can easily result in overspray.

Color

White, Black (other colours on request)-gloss

Expiry

Two years from production date if stored in original sealed container at normal temperature. Keep away from direct sun light.

 OMAN PAINTS

Solvent based bitumen primer

oman paints is a quick drying solvent based low viscosity bitumen primer. It is used as a primer coat on masonry and concrete substrates to improve the adhesion of bitumen based membranes and coatings. oman paints is low in viscosity, which allows it to penetrate into the concrete pores and improve the adhesion between the membrane and the concrete surface. In addition to that, the primer also acts as a binder for the dust particles which gets accumulated on the concrete surface even after cleaning.

CHARACTERISTICS

- Improves the adhesion between bitumen based sheet membranes and coatings
- Cold applied, does not require heating
- Binder for dust particles
- As a curing compound on freshly cast concrete.
- Anti corrosive
- Conforms to the following standards
- ASTM D 41 - Asphalt primer for roofing, damp proofing and waterproofing
- BS 3416, Type A Class C - Bitumen based coatings for cold application, suitable for use in contact with potable water

FIELDS OF APPLICATION

oman paints is used as a primer and sealer coat prior to the application of bitumen based waterproofing membranes and coatings.

APPLICATION INSTRUCTIONS

The application temperature should be between 5°C to 55°C. Application procedures may vary slightly depending upon site conditions. The general recommended guidelines for the application of the primer is as follows:

Surface preparation

The surface shall be cleaned thoroughly of all contaminants like dust, traces of curing compound, oil and grease. All surface imperfections, nail head protrusions, structurally unsound and friable concrete shall be removed and repaired with a suitable POLYCRETE® concrete repair mortar. The surface must be dry before priming with oman paints.

TECHNICAL SPECIFICATION

PROPERTIES	VALUES	TEST STANDARDS
Density, [g/cc]	0.85-0.90	ASTM D 1475
Solid content, [% by wt]	40±2	ASTM D 1644

All values given are subject to 5-10% variation

Application

Mix the contents of the pail or drum for a few minutes to remove any sediments. Apply the primer @ 4-6 m²/L to a clean smooth and dry surface by brush/roller. Allow the primer to dry prior to the application of the membrane. For highly porous surfaces application of a second coat is recommended.

COVERAGE

The coverage is 4-6 m²/lt./coat. However, the coverage will depend on the porosity of the substrate. In order to ascertain the exact coverage, a trial application is carried out at site.

STORAGE & SHELF LIFE

The pails and drums must be stored in a covered, dry and shaded area, away from direct sunlight, UV and other sources of heat and protected from extreme temperatures. The shelf life of the product is up to 12 months if stored as per the recommendations. Excessive exposure to sunlight and UV will result in the deterioration of the quality of the product and reduce its shelf life.

HEALTH & SAFETY

oman paints contains volatile solvent with a low flash point (38°C). It should be kept far away from naked flame. Avoid inhalation of vapors and ensure there is adequate ventilation in the work place. Gloves, protective masks and goggles should be worn during application. If swallowed seek medical attention immediately.
